February 15, 1991

Dear Zella -

I have been travelling and only just heard the news of Salva's death - actually in a phone call to Alex Keynan in Jerusalem.

"Ecce homo!" - I can add little to what the world of scientists, his friends and admirers have said about him. Most of all I am sorry not to have been closer to him (and to you) in recent years. He was so supportive of me as a brash young man; and I have always appreciated that very much.

Please let us know when you might be in New York, that we might see you.

Our fondest thoughts!

Joshua and Marguerite

* I have inscribed this to tell you that I am "back in the lab", and enjoying that very much. At 65 trying to knock down some of the "outworn truths" of 30 years ago.
