Dear Dr Lederberg:

In Dr Hershey's absence I looked around his room for a file of the collection of phages, but failed to locate it, and without it I can not identify the code numbers on the labels.

Dr Hershey will be back early in August and will be glad, I am sure, to send you the sample of S. typhi-murium phage (the only one we have isolated about 1926)

Yours truly
J. Fronfenbrenner
