some hypotheses falsified:

in fact:

Van Niel Haagen-Smit

encountered Ed quite independently of one another, and of Beadle's recruitment of Ed from Kögl's lab!

I am learning something of the academic politics of Stanford in 1944. CV Taylor + Tressider and the Dept were in a multiway rumpus! My suspicions (recollections?) of Ed having been nudged out in 1945 are verified by Van Niel!
