Dear Josh:

Thank you very much for your note on transduction in K12. It caught up with me only a little while ago in Switzerland. "I have only just come back and have not yet heard what, if any, discoveries have been made here during the summer. By way of retaliation I am sending a summary of Marguerite Vogt's work and a summary which I made for for the NFIP on the Royaumont meeting.

Please give my regards and congratulations to Larry Morse. I think it's wonderful that he has hit on a nice discovery.

With kind regards

Max D.
