Dear Dr. Lederberg:

Your cooperation in evaluating critically the enclosed manuscript entitled

"Neurospora Lactase. I. Properties of Lactase Preparations from a Lactose Utilizing and a Lactose Non-Utilizing Strain"

submitted for publication in ARCHIVES OF BIOCHEMISTRY would be greatly appreciated.

In addition, if acceptable, we should like you to consider the following points when evaluating the attached paper:

1. Is it possible to condense the manuscript? If so, which part(s), and to what extent?
2. Are the problem and approach original; does the paper contain new results, or is it of a confirmatory nature?
3. Would it be more appropriate to have the paper submitted to another journal? If so, please specify one as suitable.

Thank you for your assistance.

Sincerely yours,

THE EDITORS
