7-9-52

Dear Sir:

I am inquiring in regards to your request for a girl to do lab work this autumn. Has that position been filled?

I am a graduate student in zoology during the regular term, assisted in zoology last year, but would like a job which requires no homework so I can spend more time on my research and my own coursework.

Am coloured. Seemingly this has made me ineligible for many jobs I have sought thus far this summer.
