Memo/Reply From
JOSHUA LEDERBERG

TO: Ralph Gomory

APR 22 1980

Lecture / yours of Apr. 14

I would be delighted, but I hope the latter part of September is soon enough. How about the 29th? If not, please call my secretary to negotiate a better date.

Unless you've heard more than you want to know, I suggest the science and technology of DNA splicing ("recombinant DNA") as the topic. I may be able to add more of the historical framework of its development than has been written about + read widely in the press. If you wish to suggest any alternatives, I'd be happy to discuss it. Thanks you for invitation.

Yours,

Joshua Lederberg
