JAN 3 1956

Dear Josh,

Thank you for your letter and your reprints of your letter to Science - We understand perfectly well your position based on data coming from segregation of heterozygotes and I hope it will soon be possible to unify the various data in a simple theory. We have done a little bit more work on K12 and we will soon send you the copy of a short manuscript -

As you know, I am ~~going~~ probably going to the States next summer. I still do not know how long I shall be able to stay and where I will go. This will probably be mostly a matter of money. Anyway I hope very much to see you here or there and to talk with you -

Best wishes for the New Year and best regards to both of you from

François
