Memo/Reply From
JOSHUA LEDERBERG

TO: DAH

MAY 27 1984

Dear David

Your talk at AAAS presidents... moved me to share the material I just sent to Frank Press.

I have no doubt that Archimedes is furthering his own career by exciting military support for biotechnology. It may still be possible to mobilize both US and USSR science for a commitment against secret research in this area which is the only hope of defusing a technology race.
