Dr. Joshua Lederberg
University of Wisconsin
Madison, Wisconsin

Dear Dr. Lederberg:

I am a student at Antioch doing a project with triphenyl Tetrazolium chloride. Since I read a reprint of your work with the stain, I was wondering if you could send to me any information about your work which wasn't covered in the article in the Journal of Bacteriology in 1948.

We would appreciate any suggestions as to type of bacteria and conditions you have found best for working with it.

We would also appreciate any reprints you have of your papers pertinent to use of TTC.

Thank you.

Yours truly,
Nettie Sarow
