Dear Joshua,

I have a student who wants to carry out a senior problem with the aim of doing some elementary bacterial genetics.

He would like to repeat one of your experiments on genetic recombination in E. Coli. For this he needs such compatable stocks as you suggest but perhaps

your # 58-161	i.e.	$B^- M^-$
and # Y-10	ie.	$T^- L^- B_1^-$
and your standard K 12		

would be helpful.

Would you be a good fellow & send us these stocks? and have you any suggestions.

I hope that you & your wife are well.

I am afraid that we did not visit much last Summer.

Yours
Allan Scott
