Personal Memo from
JOSHUA LEDERBERG

Dr J J Gargus
Emory

JUL 21 1987

Thank you for the reprint on mutant isolation.

As you may have noted, the title came to my attention via your having cited my 1950 handbook. It is gratifying to see the pro → en extension of these approaches.

Davis 1948 (your ref. 12) is however not an "abstract." You may be amused at the reprise he and I just wrote on our coincidental discovery of the penicillin method.

Sincerely,

Joan Lederberg
