Sat.

My dear Francis,

Thank you for your letter on the polypeptides.

I think you will be interested to know that our dark lady leaves us next week & much of the 3 dimensional data is already in our hands. I am now reasonably clear of other committments & have started up a general offensive on Nature's secret strongholds on all fronts: models, theoretical chemistry, & interpretation of data crystalline & comparative. At last the decks are clear & we can put all hands to the pumps!

It won't be long now.

Regards to all

yours ever

MH

P.S may be in Cambridge next week.
