Dear Josh,

I think I will go to the meetings some time Friday afternoon and will meet you there.

Your coming and a party last week were the occasion of our cleaning up our guest room. You will be the first Settlers.

I secured tickets for The Moon is Blue for Saturday night. Hope we can also see the Cezanne show while you're here.

Dick Klein, a botany student, who works with crown gall and the like wants to talk to Zinder about the "contraceptive" devices. He wants to see if there is any interaction between virulent and avirulent strains of bacteria. He wonders if Zinder will be here and if he can see him.

Szilard has been east and returns today.

I haven't heard from Sol or Sylvia about their coming.

See you Friday

Cheers

P.S. Velvet arrived. Many thanks. Will pay you this week-end.
