UNITED STATES
ATOMIC ENERGY COMMISSION
WASHINGTON 25, D. C.

Oct. 5, 1950

Dear Josh,

Just a note to explain my silence. I have just returned from a two weeks trip I had originally scheduled for mid October but set up to the last of September. Hence I have had no opportunity to do anything re. the manuscripts. I shall try to complete them in a week.

Under separate cover, I am sending one of the pre-release copies of the Atomic Weapons Effects book along with an errata sheet containing the revised version. Please don't study it too closely for Bill Russell & I knocked it together in an awful hurry and then I had to modify it slightly to appease all the various factions here at DEC. I succeeded, however, in getting about 95% of our original text in and the modifications were minor. I would appreciate your comments. Essentially, the section says nothing beyond the fact that there may be a serious problem which we cannot accurately estimate and hence it is wise to be conservative.

I shall look for the Ø 226 culture. I wish to

thank you for the transportation, dinner & pleasant visit at Columbus. Greetings to Esther

Yours truly

May
