August 14

Dear Dr. Lederberg:

Under separate cover, I send you a reprint of my paper issued in Revue Canadienne de Biologie.
The reprints of the paper dealing with phage growth on irradiated bacteria are still in France. As I go back to my country ~~at~~ by the end of next month, I shall send you one of them from over there.

Perhaps would you be interested in another paper by myself and R. Wahl, issued in Annales de l'Institut Pasteur 1945 entitled "Recherches sur l'action des rayons ultraviolets sur les bactériophages".

I would be glad to keep in contact with Dr. Tatum and you, and to receive in France news of your work. My address is Institut du Radium
26 rue d'ULM
Paris (5) France

With best regards to Dr Tatum and to you

Sincerely yours

Raymond Latarjet M.D., Ph.D.
