Dear Joshua: 11/14/48

When you come to Chicago next Friday, can you bring me two strains of Salmonella, one sensitive, the other lysogenic?

I hope the K-12 mutants arrived OK. Can you also bring along the exact composition of your EMB synthetic agar? Miss Kanu, who will also be in Chicago, has had horrible troubles with her water-alcohol washed agar lately and suspects something in our medium is responsible.

Thanks, Lucia
