Dear Joshua,

I'm sorry that I can give you no information about your lost carton of papers. I can imagine how lost you must feel if you still have not recovered it.

Glad to hear that you like Madison and I hope your living quarters are pleasant if not super.

Do you know of a good recent (review) work on the genetics of Yeast? One of my associates needs the information before he selects a strain for irradiation experiments with the Betatron.

Would you send me a reprint of your Tatum-Lederberg article & keep me posted.

Best wishes

William
