Dr. M. Demerec
Biological Laboratory
Cold Spring Harbor, Long Island

Dear Dr. Demerec:

Thanks for your good letter of the 30th, inviting me to be a guest of the Laboratory this summer. I want very much to come and think I can say tentatively, at least, that I will be there during the month of August with my wife and two children. I am enclosing the form filled out as requested.

I have also wondered whether the three-semester system which is going into effect pretty generally throughout the country will make any great difference in the plans for this summer at Cold Spring Harbor. If it turns out that practically nobody is coming this summer, so that you feel we ought to call things off, please let me know.

You will understand, as I told you in Dallas, that I will spend my time at Cold Spring Harbor working up data and writing papers. I shall probably bring along a microscope and some slides and do a little cytological work at the same time.

With much thanks for your kind invitation,

Yours truly yours,

T. M. Sonneborn
