Dear Josh & Esther, we are taking a ~~three weeks~~ holiday with ~~the family~~ in the new house. Everything fine including the weather, but Violetta has an staph infection which is somewhat troublesome. With Aug 24 will start work again. Tempo Medico has sent you (and to me also) the Milan interview. There are a few inexactitudes, but none of them serious and on the whole I think they made a good job. The committee for examining candidates to the genetics chair has been named. Geneticists have not obtained a majority, as I feared. Giovanni's and Ruggero's chances seem pretty dim, I hope my own have not deteriorated too much. It is very unfortunate. All the best from Alba, the children and myself. Luca. 13.8.59.
