LONG ISLAND BIOLOGICAL ASSOCIATION
COLD SPRING HARBOR, NEW YORK

BIOLOGICAL LABORATORY

Monday 24th July.

Dear Professor Lederberg,

I am just writing to let you know when I will be arriving at Stanford University. I am flying from New York on Monday August 7th by flight AA17 due to arrive at San Francisco about 2.30 pm.

We are now just half way through the phage course. So far it has been very interesting and we seem to be covering a fairly comprehensive range of techniques. There has also been a very good series of seminars associated with the course.

I am very much looking forward to my stay in Palo Alto and to seeing you and Mrs Lederberg in a fortnight time,

Yours sincerely

Walter Bodmer
