RO

May 8 1959

Dear Allen:

We're just on the point of leaving for a trip to Europe but I will try to get in an answer to your letter.

I don't think we have a position here for your particular interests. We already have a considerable concentration on biochemical genetics and what we are now looking for would be background in mammalian & human genetics to fill out the departmental program. But I will keep your name in mind & you are bound to get a number of inquiries.

Good luck

Joshua.
