Dear Joe,

Thank you very much for your very nice and very interesting letter which was received while I was on a visit in the USA. I am very glad to have all the information you gave me. I am referring to the information concerning recombination and transduction, not to that concerning "my job in Texas". The latter is most curious too, but — at least — premature.

With kind regards to your wife and yourself, from both of us,

Sincerely

Boris Ephrussi
