Holloway

Bacteriology Dept.
18 - 7 - '58

Dear Josh & Este,

Val has told me that in your letter to her, you seemed reasonably definite that you would miss the Montreal conference & I am very disappointed of course that I shall not see you.

I would still like to see Madison & a chap I knew at Caltech Bob Lester, who is in the biochemistry dept has invited me to stay with him & I expect to be there on the weekend of August 29 - Sept 1st.

Will there be anyone in your lab who will be there then. What about Larry Morse? or Hirota?

I am looking forward to seeing Madison very much. I have heard a lot about it. from Syd, Nancy & of course yourselves & with Bob Wright coming, I should be failing in my academic qualifications if I hadn't been to Madison

My plans are going very well & all is organized. I trust you will have a very pleasant journey yourselves

First fold here

and that the Stockholm conference will be to your liking.

All the best

Bruce Halloran

P.S. The stop press news is that we have pyocinogenic transfer (transduction?) from multi-A to an L strain.
