NATIONAL SCIENCE FOUNDATION

WASHINGTON, D. C. 20550

14 JUN 1978

Dr. Richard Lyman, President
c/o Office of the Research
Administrator
Stanford University
Stanford, California 94305

Proposal/Grant No.
MCS78-02777

Dear Dr. Lyman:

It is a pleasure to inform you that $140,517 is awarded to Stanford University for twelve months support of the initial level of effort of the project entitled, "Helgen: A Computer Science Application to Molecular Genetics," as outlined in the above-numbered proposal. The project has been approved on scientific merit for approximately two years of effort. This project is under the direction of Edward A. Feigenbaum, Department of Computer Science and Joshua Lederberg, Department of Genetics. This grant is effective June 1, 1978 and unless otherwise amended, will expire on November 30, 1979.

An unfunded period of six months is included in the award period to provide flexibility in the performance of the project.

Contingent on the availability of funds and the scientific progress of the project, it is our intention to continue support at approximately the following level:

2nd increment $153,959

The request for continued support should be submitted in accordance with Section 253 of NSF 77-47.

This grant is subject to the provisions of FL 118, "Grant General Conditions."

The cognizant NSF Program Officer is Ramon Barrett, Intelligent Systems Program, Telephone: Area Code 202-632-5743.

The cognizant NSF Grants Manager is Aileen M. Buie, MPE/BBS/SE Branch, Telephone: Area Code 202-632-5940.

Sincerely yours,
Michael L. Renerick
Contracting Officer
