Dear Dave:

If I can think of the paragon you want, I will let you know. My own students have all been well placed, and there is a distinct shortage of good people for this kind of job. I have a couple of postdoctoral fellows coming this summer – if you still have an opening one or two years hence they might suit very well. I will circulate your inquiry around Stanford; I suggest you also contact CalTech (say H. Mitchell) and Berkeley (G. Stent).

Best wishes

Joshua.
