Marine Biological Laboratory
WOODS HOLE, MASSACHUSETTS

Sept 5, 1954

Dear Josh:-

The enclosed is a copy of your notes of our conversation of 8/23/54 with minor modifications. If I can get ahead enough to have my course outline typed, I'll try to arrange to send you copies of the lectures as I proceed, unless you'd rather get them all together at the end. As I told you, I'll deal mainly or entirely with the Protozoa this year.

The trip to Ithaca wasn't bad at all. Next year we hold the meeting at Madison!

I'm sorry I had to be away during your last day or two here. Even if I did work largely at home, it was wonderful having you and Esther around and being able not only to listen to you when you addressed yourself to me, but sometimes even when you talked to others. A very good year to both of you!

As ever,

Tracy
