Jan 25 1948

Dear Josh:

Hope you didn't think I had departed this life. things have been pretty busy, plus a dose of flu. Your penicillin method works well on C_1, C_2 - with (1) mutant in C_1 - the rest v. unstable. C_2 still OK. - No word from Boivin - Have you? Is the penicillin paper out?

The Genetics paper in Heredity is excellent - Don't forget a reprint or two. Just had occasion to talk to Mike D. & to read MS. of your paper on Maltose util. Very interesting but are you sold on 3 enzymes: 1 gene? Proof?

Regards to Esther -

yours Ed
