Memo from

JOSHUA LEDERBERG

To: James F Crow

NOV 15 1976

Ed Tatum

Jim – Could I ask of you the particular favor to check the University / State Library Archives * if they have any files of letters (papers) that might be helpful here.

Besides TATUM as a key word, E.B. Fred's papers just might have some letters bearing on 2 matters that still elude me:

1) ~~Anything about~~ What he worked on during his year at Utrecht (1936-37) with Kögl.

2) How his name came to Beadle's attention

Fred or Peterson should have written some letters of recommendation and it would be illuminating to find them.

---

* and the Bact. Dept. I wonder if there is anyone still at UW who remembers Ed as a student. I have written to Perry Wilson and Esmond Snell.

Jos.
