Personal memo from
JOSHUA LEDERBERG

Prof Dan Hartl
2/4/89

Dear Dan

Gene/enzyme evolution

Thank you for the preprint. Jim had told me you had a Perspective coming. (See Marks for one of mine).

Yes I have a sentimental attachment to "lac" and have been interested in the issues you raise for a long time*. (See encl.)

Sincerely,

Joshua

*at least speculatively; I never found a duplicate "lac+", but plenty of suppressors of lac_3 ... no good methods then to verify that a destructive gene product.
