Hi! Morse rec'd 1/11/57

I'm working up that data and will really get it off soon.

Glad you enjoyed Cal. How was Stanford?

W2281 gave quite a few Lp^ref with LFT and I wanted to go back to 1210 to derive more Lp^o to see if the effect was a property of Lp or of other markers in the line.

If you stopped in Denver on your way to and from Cal. you should have advised us and we could have gone to the airport for a short visit

Larry
