Dear Dr. Federberg
Would you please, please
read my letter? Surely you
can see more & more that
we are all God's creatures
together. Man is certainly
not made a better Creature
by using animals any
way he chooses simply
because they are at his mercy.
Can you accept or even
think about the fact that
the profession of medicine
is doing some terrible
things to our world? It does
not seem to be aimed at
helping man any more
but aimed much more
toward self glory. Some
humane research is
necessary but the way
animals are used is evil.
Won't you please help
correct this?
Please help me.
