Dear Dr. Okada

Many thanks from my husband and myself for the reprints on the more efficient method of collecting thy⁻ mutants.

We had an interesting and unusual experience in visiting Japan. I was very glad to meet you at Kanazawa Univ. and hear about your recent experiments, particularly thy⁻ in recombination. What further information do you have on the inheritance of thy⁻?

You were also kind enough to say you would try to produce a thy⁻ mutant in our Bacillus subtilis strain SB 168 (ind⁻). Have you been trying this? [In case you have no copy of the strain, please ask our friend, Dr Y Hirota, in the Genetics Dept at Osaka University.

We are looking forward to hearing from you on these two points. [illegible] you have really left your old job and are now in Osaka. We hope you like it and wish you good luck in the new laboratory

Yours sincerely

[illegible]

OKADA
