Personal memo from
JOSHUA LEDERBERG
MAR 22 1988

Dr. Jerome Green
Director
Division of Research Grants
NIH

Many thanks!

to you and the NCI archivists for the 1949 ff. papers you were just able to send me. It is marvelous they can be recovered.

I do recall having seen one or a couple of the site visit reports; but I did not have my own copies.

Do you know Dr. Culbertson's whereabouts? — Dare I ask after almost 40 years?

The 1950's project you may recall, was virus-mediated genetic transduction. It will be a further autobiographical chapter.

Dr. N.D. Zinder was my grad. res. asst. on that grant. He is of course an esteemed professor at R.U. (since 1957)

Sincerely,
Joshua Lederberg
