December 22, 1954

Dr. Victor Twitty
Stanford University
California

Dear Dr. Twitty:

I was only waiting for your reply, just received, to confirm that we will be happy to participate in next summer's Growth Symposium. You have an excellent program, most of which is indeed of direct interest to us. In view of the topic we have, perhaps recklessly chosen, I hope we will not be too presumptuous in commenting on fields for which Billingham, on the one hand, and Delbrucks on the other might be better qualified.

My only reservation is that it would be extremely embarrassing, should manuscripts be required, if these had to be submitted before the end of the summer.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
