Margaret Wightman

Dear Peggy

AUG - 4 1982

Nostalgic thoughts of the fun we had on graphs were evoked so warmly, when I accidentally ran into this letter: I hope you are not to surprised to hear from me.

A great deal has happened in my own life since you left Stanford: remarriage + children; moving to N.Y. But I still connect with SUMEX; and I spend a few weeks every summer in Palo Alto.

I see you too have been fully occupied! If you are working professionally (again?) I'll be glad to send you a bit more of the work you were so helpful in getting us started on.

All best wishes to you + your family,

Robin.
