DIVISION OF BIOLOGY

Sept 17 '50

Dear Josh:

Our YMCA women like to entice you to give a luncheon talk on Space Biol. These are well attended affairs (200 ±) — half hour talks.

Of course the Biologists would like to see you and Esther too — and hear you. In fact USC YWCA women too. Any chance you could come down Nov 8 give a Gen Biol Seminar that afternoon, a Y talk the next day & Esther give a Genetics seminar?

It would be grand for us and I think you'd see some

interesting phage other work.

We'll of course take care of all travel + subsistence & we can scare up a $100 honorarium for you and an extra 25 if Esther wants to do the genetics seminar. These could no doubt be added to if you want to go to UCLA or USC.

Best regards

Beets
