B

Sept 22

Dear Beats:

We are looking forward with enthusiasm to your visit and lecture, and hope that Marion will be able to come along too. Will make final arrangements when you arrive –

I hope that while you're here you'd be willing and could find time to give an informal discussion (or seminar) of the recent advances in Neurogenetics to our gang?

With love to Marion, and hoping you won't be too busy to save lots of time for us and the Bonners!

Yours

Ed
