Dr. J. R. S. Fincham
Department of Genetics
University College
Leicester
England

Dear Dr. Fincham:

Thank you for your note of the 10th. I am looking forward to hearing your paper at Montreal. However, I will not be reading a paper, having found myself too preoccupied with other commitments. In any case, I would not have found it easy to find a topic that you will not be covering according to your present outline.

Yours sincerely,

Joshua Lederberg
Professor of Medical Genetics
