Personal Memo from
JOSHUA LEDERBERG

Dr John H Moore

JAN 30 1986

Dear Johnnie

History of (bacterial) genetics.

Bart Childs has shared pgs 291–296 of your writing with me

I thought you'd be interested in my draft on Ed Tatum. I've been looking closely at the connection of Garrod and the Neurospora work. It's slightly more complex than has been given out.

Could you let me see pgs. 296 ff on your treatment of Neurospora?

It's been a while since we've seen Betty + yourself.

all the best,

J
