Alex Forger

1/16/85

Dear Alex -

We missed you at the LAB this evening; but even more were concerned for you, knowing what extremity would be needed to deter you. I am re-assured, I hope accurately, that you have a passing virus. Next year do take advantage of the "flu" vaccinations we offer every fall.

Thank you for the gift acknowledged herewith, and for the critical but sympathetic and wise voice you offer to many of our councils.

I hope soon to take advantage of your invitation to lunch together, and to see how quickly we can add further enhancement to our intimate engagements from our own initiative.

All best wishes to Nan + yourself,

Yours,

Jim
