Professor Joshua Lederberg;
Department of Genetics,
Stanford University,
Palo Alto, Calif.

Dear Professor Lederberg:

I would like to thank you very much for sending me a reprint of your paper on sib-selection of pre-adaptive mutants, from Genetics 1956; and also for the kind note enclosed therein. We have found this technique very helpful for isolating a streptomycin-resistant variant of Vibrio comma.

HOENIGER, J.

I am about to branch further afield at the moment, both in lectures and labs. (particularly in lab. research, having just returned from a stimulating time with Dr. Robinow at Western), and am wondering if you could let me have reprints of several relevant papers, namely:

May 21
57
B. ✓

J. Bacteriology 71: 497 (1956); 75: 143 (protoplasts)
Harvey Lectures 53: 69 (1959). 70

Again, very many thanks for your kindness. And apologies for my troubling you.

Yours sincerely,

Judith Hoeniger

Judith Hoeniger, Ph.D.,
Assistant Professor.
