Personal memo from
JOSHUA LEDERBERG

Adm. ER Zumwalt

MAR 8 1993

Radiation Conference

Dear Bud –

Political sensitivities may obtrude but very important work is going on within the USG –

Armed Forces Radiobiology Research Institute – Bethesda.

DoE – Dave Gates would be the contact person 301: 903-3251

Arthur Upton, now at NYU Medical Center, formerly director of the NCI, has worked a lifetime on these problems.

James F Crow, prof.-emeritus at U-Wis (Madison) is the senior statesman on genetic effects.

You do have excellent leadership from Jack Schull.

Good luck
Joshua.
