Herschel Roman

OCT - 5 1981

Barbara for Nobel is of course an excellent idea although my own view is that AZ/DS was not even her most important work.

I would be glad to endorse and forward a nomination that you and Marcus prepared.

However I am pressing for another equally compelling candidate. My dim success in recent years does not support your optimism that my voice carries much weight in Stockholm these days.

Howbeit, I will enthusiastically comply, as I agreed.

Yours,

Jim
