Creativity / Psychotherapy

Thank you so much for your thoughtfulness in sending your new book. I look forward to after July 1 and the leisure to embrace it.

I don't feel qualified to do much psychology in my future work — though perhaps Marguerite can continue to ~~[illegible]~~ remind me of the importance of that perspective. And of course I have some kind of psychological model (though mostly a gross combinatoric with well engineered critical filters) for theory creation.

Perhaps my reading will fill in.

But yes, let's stay in touch.

Yours,

Jim.
