Personal memo from
JOSHUA LEDERBERG

Dr. Stephen Edelbaum
UCLA.

MAY 19 1993

Dear Dr. Edelbaum -

— Arginase —

I am very grateful to you for your critical and sobering perspective on Rogers' work.

I had extensive correspondence with him, but to the best of my recollection did not meet him just once. So I have no personal basis to add to your assessments. He died a few years ago; I've urged his widow to deposit his papers in extrusa with the APS in Philadelphia.

To try to get a more detailed clinical account of the treated argininemic children, I tried writing to Terheggen but mail was returned. Whatever else is said, the clinical group bears whatever responsibility may attach to the treatment decisions.

Sincerely

Joshua Lederberg
