Memo from JOSHUA LEDERBERG

To: Ed Adelberg

NOV 18 1978

Thanks very much for your contribution here, which is indeed useful. I hope that the task of scrutinizing the archives really is herculean — namely that they exist! — but I am glad you did not take on an impossible burden for yourself!

Yes I did have to sweat through some botany: though in the event it was not totally hideous: my main question was to criticize Wegener's evidence on Continental Drift! I had not realized the department's resistance went so deep!

I will of course send you a copy when the draft is done.

Yours,

PROFESSOR JOSHUA LEDERBERG
