Memo/Reply From
JOSHUA LEDERBERG

TO: Dave Perkins

DEC 30 1980

Neurospora 1941. to yours of Nov. 7

Concurrently our correspondence, I tried another cycle with the NY Bot. Gardens. Redundancy and perseverance pay off! Now they have an archivist and they do have B.O. Dodge's critical correspondence which helps nail down some of the very points at issue. I had interview of Tavie Bell some time ago, and soon had the good luck of encountering Carlton Schwerdt and his lecture notes of the course!

So I am enclosing copies of the relevant material. I'm afraid the most critical info on strains must be in Beadle's notebooks (extant?) I'll have someone re-dig in Tatum's remaining notebooks on re strains too.

Have you published on N. crassa wild types?
