Memo from

JOSHUA LEDERBERG

To: Howard Tatum

NOV 1 1978

Ed at Utrecht

Of course, as I now realize, Ed recorded in his Nobel lecture that he worked with Kögl and met Fries there. This is the only detail I have.

Josh.

Do you know whether Ed ever contemplated (as you yourself did) a career in medicine or medical research? Dam of course think of your father's influence on career orientation.

PROFESSOR JOSHUA LEDERBERG
Department of Genetics
School of Medicine
Stanford University
Stanford, California 94305
