Dear Josh:

Thank you for your kind note - the whole family & I appreciated it. The years at Stanford were fascinating, the years in the NW calm & pleasant, but after the past 9 months Bob deserved the rest. The whole family gathered to celebrate his life.

So often we have thought of you & Marguerite — & Anne — the latter still a small child when we knew her - wonder what she is like now! Also wonder if you still own the Rescadero house — such nice times out there

I was most interested in the clipping you enclosed — & am really pleased you have a chance to return to the laboratory — you have earned it after your spectacular turn at administration.

Warm greetings to your family —

Sylvia
